

Carbon Reduction Plan

Supplier name: Hallmark Consumer Services

Publication date: 19/04/2024

Commitment to achieving Net Zero

Hallmark Consumer Services is committed to achieving Net Zero emissions by 2030.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Please provide details of your organisation’s baseline emissions below. If your organisation has not previously assessed or reported emissions, please detail this below and use your first reporting period as your Baseline

Baseline Year: 2022	
Additional Details relating to the Baseline Emissions calculations.	
Measured as part of our EcoVadis Accreditation	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	73.29
Scope 2	89.6
Scope 3 (Included Sources)	1845
Total Emissions	2007.89

Current Emissions Reporting

Reporting Year: 2023	
EMISSIONS	TOTAL (tCO2e)
Scope 1	0.58
Scope 2	90.74
Scope 3 (Included Sources)	1540
Total Emissions	1631.32

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 1500 tCO2e by 2029. This is a reduction of 92%. Please note that these are currently being calculated as part of our EcoVadis Accreditation

Progress against these targets can be seen in the graph below:

Carbon Reduction: Projected vs. Actual

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2022 baseline. The carbon emission reduction achieved by these schemes equate to 71.57 tCO₂e, a 43.9%ge reduction against the 2022 baseline and the measures will be in effect when performing the contract

Briefly provide details of some of your completed carbon reduction projects. This is for information only.

- We are ISO14001 certified, from 2011 onwards
- We have moved to all lighting to be LEDs
- Energy Supplier uses 100% ZERO Carbon - British Gas "Zero Carbon Energy for Business"
- Nuclear - 26%
- Renewables - 74%

In the future we hope to implement further measures such as:

- When we replace our vehicle, we intend to move to an electric vehicle
- Most of our emissions are Scope 3 and are in the process of measuring this, as part of our EcoVadis Accreditation
- Exploring solar panels for our warehouse operation, in addition to our current office solar panels

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

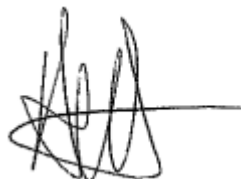

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Elin Betts
